

NEVERSTOP™ VERTICAL BALER CONVEYOR SYSTEM

Too much volume for a standard Vertical Baler set-up, but not enough material to justify a costly horizontal? We have a solution for you. The NeverStop flow technology allows the conveyor to dump material into a gather bin where your recyclables are stored until the baler runs through its compaction cycle. The integrated conveyor system links seamlessly with just about any of our other baler models, allowing a constant flow of material from the feed hopper into the baling chamber.

PRE-PACK UNIT

- **Bore Cylinders** – Two 2" Bore Cylinders x 1 ¼ inch Rod x 30" Stroke
- **Feed Opening** – 45" W x 20" L x 36" D – with Photo Eye
