# PET BLOWER – REM® PBB PET BLOWERS

REM's® model PBB PET blower can be used to transport both loose un-flattened and flattened plastic bottles into a trailer or other container. Save money on labor, one of your largest expenses, by putting this unit to work for you. When fed by REM's® model CC5B-Perf, Perf-5, or other conveyor this unit makes can transport a breeze!

PROVEN DESIGN
REM's® second generation field-proven blower design is easy to service, built for long life and low maintenance. This tough, rugged unit is mounted on casters for ease of movement – just push it in place, lock the casters, adjust the blow-tube, and watch your bottom line grow.

ALUMINUM CAN BLOWER
Also available in an aluminum can blower configuration, featuring a slightly smaller diameter blower housing and blow-tube to move your cans with ease.

FEATURES

- High-performance cast aluminum reverse incline blower keeps bottles from jamming
