

KANNAMILL SERIES

CANNABIS SIZE REDUCTION

KannaMill cannabis size reduction equipment has been designed in partnership with high production cannabis processors. At the heart of every KannaMill, is our long history of manufacturing rugged, durable equipment. Our heavy-duty designs meet the demand for low maintenance, and are scalable for various levels of high-throughput production. We ship worldwide, and welcome inquires for full custom equipment to meet customer specifications.

CONFIGURATION CONTROL

From whole plant to your specific size needs, KannaMill promises uniform, perfectly sized end product. KannaBevel edge hammers have been designed specifically for optimizing trichrome exposure without compaction or separation from the underlying biomass, allowing KannaMill to pulverize without over-fiberization, eliminating the need to manually de-stem pre-roll material.

ANTI-RESIN SYSTEM

KannaMill has been specifically designed with industry experts to meet the unique challenge of processing the notoriously high-resin content of cannabis. Every KannaMill comes standard with our anti-resin system for improved size reduction, and throughput. The Anti-resin systems also provides for easy cleaning and maintenance.

FEATURES & OPTIONS

- As your business grows to process more volume, so does KannaMill. Scalable to 4" or 12" infeed opening to process up to 300 lbs/hr.
- KannaMill has been designed to be incredibly energy efficient, using only an 8 amp power draw – roughly equivalent to 3 cell phones. KannaMill can plug into a standard wall outlet, so there's no need for special electrical service.
- Every KannaMill comes standard with two different screen sizes, standard Safety interlock and standard collection infeed and conveying options for easy feeding and collecting without product loss. A stand that accommodates a product collection tote is also available, with or without casters.
